

**KDC Products Critter Gitter
Radio Control Module**
Turns Critter Gitter off and on by radio control

To pair a remote. Press the pairing button 3 times then when the red LED is lit, press the On (or A) button of the remote. (Some remotes are labeled A nd B instead of On and Off).

The red led will blink then be on again.
When that happens press the Off (or B) button on the remote.
The red LED will blink then stay off.

Repeat this for an additional remote.
